EPR IN PWM: A STEP TOWARDS CIRCULAR ECONOMY

ELEMENTS OF EPR GUIDELINES

I. Focus on four categories of plastic packaging.

Category I

Rigid plastic packaging

Category II

Flexible plastic packaging of single layer or multilayer (more than one layer with different types of plastic)

Category III

Multi-layered plastic packaging (at least one layer of plastic and at least one layer of material other than plastic)

Category IV

Plastic sheet or like used for packaging as well as carry bags made of compostable plastics

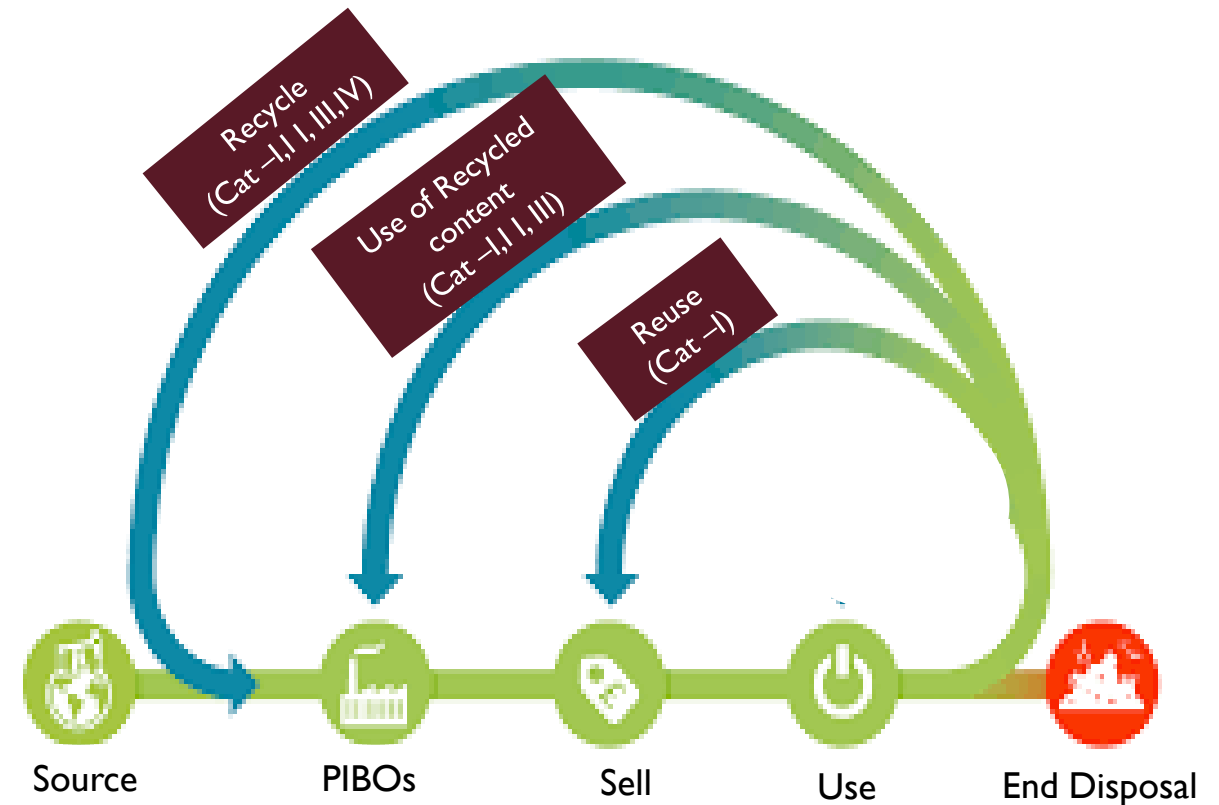

ELEMENTS OF EPR GUIDELINES

2. Obligations for Reuse, Recycle, Use of Recycle content and End of life disposal.

■ Mandated targets specified for :

- Reuse of rigid packaging (Brand-owners) (2025 onwards)
- Use of recycled plastic (2025 onwards)
- Fulfilling EPR obligations through recycling (2024 onwards)
- Compostable plastics (2024 onwards)

■ Remaining EPR target to be fulfilled through End of Life Processing (Cement Kilns, Co-processing Cement Kilns, Waste to energy and Waste to Oil).

EPR in Plastic Waste Management

The diagram illustrates the EPR cycle for plastic waste management. It starts with 'Pre & Post Consumer Plastic Waste' leading to 'Segregation at Material Processing'. This is followed by 'Recycling of Recycled Plastic', 'End of Life PPE Processing', 'Segregation', and 'Recycling of Recycled Plastic' leading back to 'Pre & Post Consumer Plastic Waste'. The central hub is 'EPR in Plastic Waste Management'.
